

THE BACKTAPPER™

A whole new way to sell your shots and mixed drinks! Now wait staff can go to your customers without a tray full of cups. Not only will the BackTapper™ attract attention, but you will sell more shots and mixed drinks faster.

The BackTapper™ can also be used to refill customers on drink specials. Use it with a wristband special for the night or to promote a new drink!

The BackTapper™ is constructed of a 1/8" thick acrylic tube and a gravity fed hand tap. The unit is mounted to a lightweight backpack shaped to comfortably fit the curve of one's back. The shoulder and waist straps are nylon cordura and completely stain resistant.

Comes complete with a handy waist pouch to carry your plastic cups for dispensing.

Remember, anything served behind a bar can be served in a BackTapper™!
